This can create a cycle that can often end up taking control of their lives. Being isolated as this also reduces social skills and physical socialization can lead to social phobias and anxiety. Videogames in themselves can be stressful, especially if women, disasters or dangerous scenarios are played in the games. Frustration and schedule derived from addiction is aggravated by depression and can make a person show unusual patterns of aggressive behavior towards anyone who interrupts his video game game. Videogames, particularly the addiction to the game, can be harmful to the health and well-being of a person, particularly in the most young age development. Unfortunately, video games provide a "Scape", from these tensions of real life: the main addicts to continue with the game. Some videogames that promote education, cognitive skills or physical exercise can be beneficial. The American Academy of Pediatrics recognizes that some educational games can improve cognitive, literacy and social outcomes for children from 3 to 5 years. In adults, this can lead to financial tension if your employment and income are affected. For children over 2 years old, the Academy recommends limiting the screen on time at no more than one hour by day. Players can even jump the proper meals in favor of sandwiches if they are invested in a videogame, which can lead to anorexia and malnutrition. For many video players, fast food and easy food meals, such as frozen dinners, become their choice fuel. Reduction of academic academic performance Photo courtesy: [Klaus Vedfelt / DigitalVision / Getty Images] Various large school children and adolescent children have also shown that the duration of videogames has a reverse relationship with performance Academic Carpal tunnel syndrome is the pressure on the nerve in its mule that allows you to feel and move in certain parts of your hand. It is likely that there are several reasons why this happens. Photo courtesy: [ftrtnig / e + / getty images] A e à, A "Video game disorder was defined as a" technical behavior "by the World Health Organization in 2018. What is the addiction to the videogames? 2. 4. 10. People can choose to play videogames instead of participating in physical exercise. However, many of these applications do not have proven efficiency and are not written by educational specialists. Sitting or lying down all the day playing videogames, combined with the deprivation of dream and bad foodbells, is a dangerous combination that can cause a high blood pressure and even the metro or heart disease. They can also be exposed to a more related advertising during games, which can subconsciously influence your choices. 3. The prolonged periods of sleep deprivation can take a great toll on health a person. Parents are encouraged to participate in interactive learning and unstructured game to help in the development of their children of essential skills. 7. People should avoid games during meals and for at least one hour before bedtime. Depression can lead to a worsening of other others effects, such as deficient diet, reduction of physical activity and contempt for personal hygiene. Sweeking refreshes and energy drinks are also popular to help players stay up with the hours of last hour night games and combat sleep deprivation. If you are eating while getting distracted by games, they can be eating more, or focusing on a game, they can make them not aware of their satiety. It is also common to develop a pattern not to take any rest or make any kind of stretches to relieve tired muscles a e
